

## SCEPTER® 2-1/2" Meter Offset

The Scepter® 2-1/2" Meter Offset provides more space to accommodate larger sized aluminum wire bond and applications for 200A services. Meter Offsets are made of durable rigid PVC and used to connect PVC conduit or duct to a meter box. The offset is designed to move the path of the conduit/duct away from a wall into the holes in the box or meter box.

Dimensions		Part Number	Product Code
inches	mm		
1-1/4	40	MO25	077941
2	50	MO35	077942
2-1/2	65	MO40	277084

### Features and Benefits:

- 2-1/2" size accommodates aluminum wire bond and 200A services
- 2-1/2" size allows connection to meter hub without the use of a reducer
- Offsets pipe to easily enable connections to junction and meter boxes
- Threaded male end and solvent weld female end for watertight connections
- Durable rigid PVC offers high impact and tensile strength even in cold weather
