

Duraplus™ Industrial VXE True Union Ball Valve

The IPEX VXE EasyFit True Union Ball Valve is manufactured using a ductile industrial grade gray ABS to ensure durability, strength and safety, with a pressure rating of 232psi at 23°C / 73°F. The valve is available from 1/2" to 2" with socket ends, PTFE seats, and EPDM seals.

The ABS VXE has all the same innovative features as the PVC and CPVC versions. This valve features an ultra-compact double block design, and full port bi-directional operation. The true union design allows the valve to be easily removed from the piping system and fully serviced. A threaded seat stop carrier provides improved seal integrity under tough service conditions while the EasyFit multifunction handle doubles as a tool for ball seat adjustment, and for tightening union nuts precisely.

Size (inches)	Item Code
1/2	337810
3/4	337811
1	337812
1-1/4	337813
1-1/2	337814
2	337816
