

NEW PRODUCT SHOWCASE

Re-Designed Pipe Re-Rounding Tools from IPEX

Polyethylene pipe is often slightly out of round, which can complicate the installation of electrofusion couplings. This is particularly common with larger diameters (10" and larger). In these situations, re-rounding clamps are required in order to bring the pipe back to a perfectly round cross section which will simplify coupling installation.

Our three new, re-designed tools now cover from 10" IPS/DIP right up to 36" IPS/ DIP diameters. The tools are shipped in a durable crate and are lightweight and are easy to install.

FEATURES & BENEFITS

- Made of tough coated steel and designed to withstand the rigors of jobsite installation.
- Light and easy to install
- Three tools cover a wide range of available diameters.
- Shipped in a durable crate for easy storage

PRODUCT SIZES

Sizes	Product Code	Package
10" IPS/DIP – 16" IPS/DIP	228358	1
18" IPS/DIP – 26" IPS/DIP	228359	1
28" IPS/DIP – 36" IPS/DIP	228338	1
