

# TOP 5 REASONS Contractors Choose RadonX™ SOIL GAS VENTING

01

## FIRST COMPLETE SOIL GAS VENTING SOLUTION

Low maintenance, engineered PVC piping solution for soil gas venting as well as humidity and VOC reduction in low-rise construction.

02

## FAST AND EASY TO INSTALL

Ultra-Low VOC, product-specific PVC solvent cement so no specific installation equipment needed.

03

## IMPROVED AIRFLOW

Unique collector pipe perforation design improves airflow to stack and reduces risk of clogging.

04

## CODE COMPLIANCE

Complies with relevant industry standards and national building code. Includes warning label and bilingual print lines for easy identification.

05

## INSTALLATION TRAINING AND SUPPORT

IPEX Sales and Engineering representatives available whenever and wherever needed.

**RadonX™**, from IPEX, is Canada's first engineered PVC soil gas venting system designed to safely collect and vent soil gas before it enters the home. It's a complete solution consisting of uniquely perforated gas collector pipes, venting pipes, fittings, accessories and solvent cement.
