

## System XFR® DWV Large Diameter Sizes

Available in up to 18" diameter pipe and fittings, System XFR® is rated for high buildings and air plenums where tighter Flame Spread and Smoke Development requirements of the Building Code have previously limited the use of thermoplastic.

### Why are DWV systems from IPEX becoming the new standard?

As an integrated solution, they meet all code requirements for noncombustible buildings. More importantly, they provide the required rugged reliability with all the added benefits of being a thermoplastic.

### Features and Benefits:

- Range of Sizes  
1-1/2" – 18" diameter
- Rated for high buildings & plenums
- High impact resistance
- Improved flow
- Lower thermal conductivity
- Corrosion Resistant
