VEE SERIES BALL VALVES

Sample Specification

Sample Specification

1.0 Ball Valves - VEE

1.1 Material

 The valve body, stem, ball and unions shall be made of PVC compound which shall meet or exceed the requirements of cell classification 12454 according to ASTM D1784.

1.2 Seats

 The ball seats shall be made of a Teflon® – HDPE blend.

1.3 Seals

The o-ring seals shall be made of EPDM.

2.0 Connections

2.1 Socket style

 The IPS socket PVC end connectors shall conform to the dimensional standards ASTM D2466 and ASTM D2467.

2.2 Threaded style

 The female NPT threaded PVC end connectors shall conform to the dimensional standards ASTM D2464, ASTM F1498, and ANSI B1.20.1.

3.0 Design Features

- The valve shall be double blocking with union ends.
- · All sizes shall be full port.
- · All sizes shall allow for bi-directional flow.
- The valve body shall be single end entry with a threaded carrier (ball seat support).
- The valve body shall have an expansion and contraction compensating groove on the molded end.
- The valve body, union nuts, and carrier shall have deep square style threads for increased strength.
- The ball shall be machined smooth to minimize wear on valve seats.
- The stem design shall feature a shear point above the o-ring to maintain system integrity in the unlikely event of a stem breakage.
- The handle shall incorporate a tool for adjustment of the threaded carrier.
- The handle shall incorporate a tool for adjustment of union nuts.
- The handle shall incorporate a opaque PVC plug that can be replaced with a plug and tag holder for valve identification.

3.1 Pressure Tested

 All valves shall have been pressure tested in both the open and closed positions by the manufacturer.

3.2 Pressure Rating

All sizes shall be rated at 232 psi at 73°F.

3.3 Markings

 All valves shall be marked to indicate size, material designation, and manufacturers name or trade mark.

3.4 Color Coding

 All PVC valves shall be color-coded dark gray with a blue handle.

4.0 NSF Listings

- All valves shall be listed with NSF to Standard 61 for potable water.
- All valves shall be listed with NSF to Standard 372 for lead content requirements.
- **5.0** All valves shall be Xirtec® PVC by IPEX or approved equal.

VEE SERIES BALL VALVES

About IPEX

About IPEX by Aliaxis

As leading suppliers of thermoplastic piping systems, IPEX by Aliaxis provides our customers with some of the world's largest and most comprehensive product lines. All IPEX by Aliaxis products are backed by more than 50 years of experience. With state-of-the-art manufacturing facilities and distribution centers across North America, we have established a reputation for product innovation, quality, end-user focus and performance.

Markets served by IPEX by Aliaxis products are:

- · Electrical systems
- · Telecommunications and utility piping systems
- · Industrial process piping systems
- Municipal pressure and gravity piping systems
- · Plumbing and mechanical piping systems
- · Electrofusion systems for gas and water
- · Industrial, plumbing and electrical cements
- · Irrigation systems
- PVC, CPVC, PP, PVDF, PE, ABS, and PEX pipe and fittings

Xirtec® is a registered trademark used under license.
Xirtec® CPVC piping systems are made with Corzan® CPVC compounds. Corzan® is a registered trademark of the Lubrizol Corporation.
