

## FIBERTEL® MICRO HDPE Microducts

IPEX's FiberTel® Micro – HDPE Microducts provide ease and versatility for fiber cable installations. Designed with a ribbed inner surface, our orange microducts reduce friction and increase ease of fiber cable installation, while a smooth outer surface allows for easy duct installation. Available in 14/10 mm and 18/14 mm sizes (OD/ID), this product is made according to the PE handbook with prime grade resin.

### NOTE:

- Before passing the fiber optic through, ensure to apply lubrication to the interior of the microduct.
- DO NOT use for power applications.

### Features and Benefits:

- Available in 14/10 mm and 18/14 mm sizes (OD/ID)
- Ribbed inner surface and smooth outer surface to reduce friction for easier installation
- Prime grade resin
- Fortify existing networks with overrides

Dimensions	Part Number	Product Code
14/10 mm x 5000'	MD14/10	121589
18/14 mm x 3000'	MD18/14	121590
