

SYSTEM XFR® threaded dishwasher bushing adapter

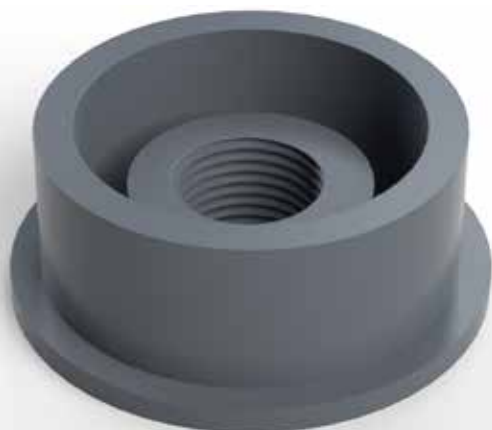

IPEX offers 1-1/2" x 1/2" and 1-1/2" x 3/4" threaded dishwasher bushing adapters made from System XFR PVC material. These adapters are designed to integrate into commercial plumbing systems and comply with ULC S102.2 flame spread and smoke development requirements.

These fittings are used in conjunction with a threaded hose barb adapter for draining dishwasher discharge. The addition of these dishwasher bushing adapters in System XFR material addresses a key need in the market, reinforcing the importance of using code-compliant materials in commercial applications.

With the new System XFR bushings, you can ensure that every component—no matter how small—meets our building code standards.

Stay compliant.. Choose IPEX System XFR.

Size (inches)	Product Code
1-1/2 x 1/2	526277
1-1/2 x 3/4	526278

Features & Benefits:

- System XFR PVC DWV material
- Flame Spread and Smoke Development ratings of 25/50 as per CAN/ULC S102.2
- Certified to CSA B181.2
- High impact strength for reliable performance in harsh environments
- Join using simple solvent welding methods
- Code compliant solution for dishwasher drainage connection in any building type

Standards & Certifications:

Flame Spread and Smoke Development ratings of 25/50 as per CAN/ULC S102.2
