CAUTION

IPEX PVC and CPVC Type BH flue gas vent products are listed and certified by ITS-Warnock Hersey to ULC S636 as complete systems of pipes, fittings and cements, and they must be installed as such.

DO NOT mix pipe, fittings or cements from different BH vent manufacturers. This can result in unsafe conditions and will void both the product certification and product warranty.

System 636 PVC is listed as Type BH Class IIA venting system with a maximum temperature rating of 65° C (149° F).

System 636 CPVC is listed as Type BH Class IIB venting system with a maximum temperature rating of 90° C (194° F).

Installers are advised to consult with appliance manufacturers for recommendations on which type of BH vent is appropriate for use with their products.

DO NOT exceed the rated temperature of System 636 products.
