The Air-Line System

Duraplus Air-Line is a thermoplastic piping system specifically designed by IPEX for conveying compressed air. Its lightness in weight and ease of installation results in overall cost savings, while its inherent corrosion resistance makes it the ideal choice for clean air applications.

Benefits

- Specifically manufactured for conveying compressed air.
- Color coated in light blue in accordance with international color coding standards.
- Easy to identify.
- Maintenance free.
- No rust, inside or out.
- Lightweight and easy to install.
- Leak free and energy saving.
- Non-toxic.
- Keeps air clean.

Safety Factors

Duraplus Air-Line has two built-in safety factors:

1. It has a highly visible, light blue coloring complying with international standards for compressed air piping. This enables users to identify Air-Line as a product suitable for conveying compressed air.
2. Duraplus Air-Line is manufactured to metric standards and is dimensionally incompatible with IPS sized rigid materials. IPS sized rigid piping is dangerous and cannot be introduced into the system.

Ratings

Duraplus Air-Line pipe and fittings are rated 185psi at 73°F.

Purchasing

Product sold in standard pack lots only.
Socket and spigot fittings are made for solvent cement welding.

Price Class Codes

Discount Code	Product Description	Discount	Multiplier
446AA	Duraplus Airline Pipe through 110mm (4")		
437HB	Duraplus Airline Fittings through 110mm (4")

WARNING

Certain compressor and lubricant oils will damage your Duraplus® Air-Line installation.
Before using and oils in the system, contact IPEX to obtain a list of recommended oils or to confirm individual oil sustainability.

An indication of the number of joints likely to be made per quart of Duraplus® cement is as follows
(it is recommended that MEK Cleaner order equals one-half the quantity of solvent cement required).

Size: mm	20 - 32	50 - 63	90	110
Size: inches	1/2 - 1	1 1/2 - 2	3	4
Joints: per quart	290	144	48	32
